

DriveWorks Overview

The Easy-to-Use Design Automation Choice for Companies that Engineer-to-Order

From entry level to enterprise level, there is a DriveWorks Design Automation product to suit the needs of most companies creating custom products. DriveWorks is proven technology that lets you automate many repetitive tasks to generate accurate design and manufacturing outputs quickly and easily

DriveWorks—A Scalable Solution

• DriveWorksXpress

Basic Rules Based Design Automation

Design Automation Wizard with basic functionality in EVERY seat of SolidWorks

• DriveWorksEngineer

Design Automation for SolidWorks Users

Module : DriveWorks Administrator

Use to capture the geometric design and configuration rules to enable a user to specify and configure product. Requires SolidWorks license

• DriveWorksTeam

Share Knowledge & Know-How Internally

Modules: DriveWorks Administrator, DriveWorks Server & DriveWorks Users

DriveWorksTeam allows several users to specify products based on the knowledge and rules captured and assigned by the DriveWorks Administrator. Requires SolidWorks license

• DriveWorksEnterprise

Enter Specification over the Web

Modules: DriveWorks Administrator, DriveWorks Server, DriveWorks Users & DriveWorks Live for Web-enabled design automation

DriveWorksEnterprise adds the ability to specify over the web.

Design Automation for Companies that Engineer-to-Order

- Do you design and manufacture products based on a theme?
- Could your products be defined by a set of rules and equations?
- Do you have repetitive design tasks that could be automated?
- Do you want to be able to specify custom products and variations easily and accurately?

The Easy-to-Use Design Automation Choice for SolidWorks

Use DriveWorks to automate your repetitive design engineering tasks. Generate the outputs and documentation you need to manufacture and sell variations of your products automatically. Outputs can include 3D models, 2D drawings, E-drawings, as well as Word and Excel documents for Quotations, Bills of materials, Cutting lists, and much much more.

DriveWorks is easy to use

1. Set up

Capture items that can change eg dimensions, features, names, documents and data. Assign your rules and create your custom forms.

2. Run

Fill out your forms, to automatically and accurately create 3D Models, 2D Drawings and documentation (such as quotes, BOM's and Cutting lists) time after time after time

DriveWorks provides several benefits:

• Powerful Design Automation

Specify to order and satisfy customer requirements and all based on YOUR rules

• Time Saving

With DriveWorks, data is entered only once saving valuable time and enabling production to commence as soon as the order is placed

• Important Aid to Quality Control

Because the output is based on specified rules, results are consistent and accurate, reducing the risk of costly errors.

• Fast Response to Customer Enquiries

Dynamic Quotations can be quickly created in response to enquiries and all based on the customer's individual requirements as well as company profitability targets

• Valuable Sales and Marketing tool

Generation of 3D models and 2D drawings enables the customer to quickly 'see' their product, and so aids the sales process

Today customers and markets demand ever increasing variation and customization

Most manufacturers wish they could reap the benefits of mass production where initial investment in design and engineering can be exploited over time.

DriveWorks provides the solution

DriveWorks enables companies to capture design knowledge, rules and experience. It then allows this knowledge to be shared so as to create new and variant designs, accurately, quickly and cost effectively.

DriveWorks System Requirements

Software Set up

Microsoft Office Professional XP / 2003
Microsoft Windows XP / Windows Server 2003
Microsoft .net framework 2.0
Internet Explorer 6.0 or later
SolidWorks 2007 or later. Preferably latest service pack.
e-Drawings 2007 or later

At least one DriveWorks Administrator license required per site. DriveWorks Administrator is the core module inside DriveWorks – Engineer, Team and Enterprise

DriveWorks Administrator and DriveWorks Server require SolidWorks for working with geometric design and configuration rules and to generate 3D output

Hardware

For all workstations running SolidWorks please check the SolidWorks website for the latest recommendations www.solidworks.com

Databases

DriveWorksEngineer

Microsoft Access
SQL Express / SQL Server 2000 or later

DriveWorksTeam

SQL Express / SQL Server 2000 or later

DriveWorksEnterprise

SQL Server 2000 or later

Companies worldwide are using DriveWorks to cut design costs and reduce the Enquiry to Manufacture Cycle for custom products

DriveWorks is affordable and easy-to use design automation software. This has been achieved by incorporating standard software tools such as Excel and SolidWorks. DriveWorks does not require expensive and time consuming programming to implement.

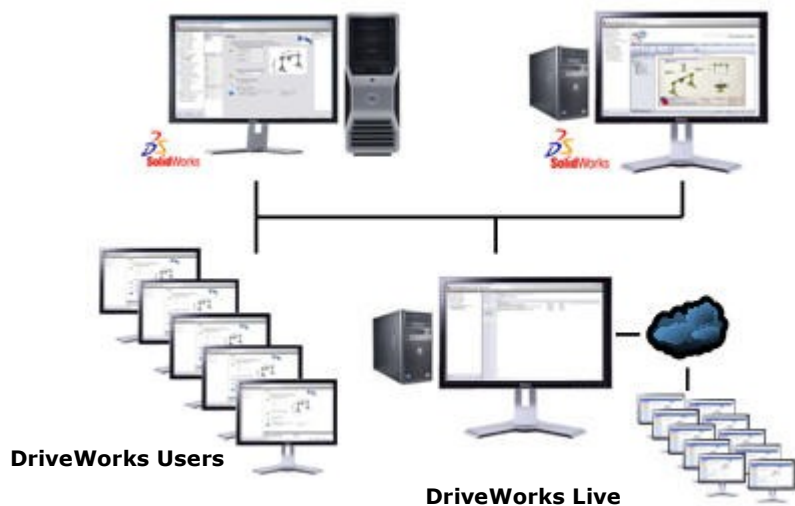

DriveWorks customers include manufacturers of commercial vehicles, custom furniture, windows and doors, conveyors, HVAC, catering and materials handling equipment, mechanical seals, and pressure vessels. In fact DriveWorks can be used by any company that needs to automate design and engineering outputs and generate a

A Scaleable Design Automation Solution

From the Design Office all the way to the Web if and when you need it, DriveWorks grows with you to meet the Design Automation needs of you and your company.

DriveWorks Administrator

DriveWorks Model Generation Server

DriveWorks—Sold Worldwide - Supported Locally

Contact your DriveWorks reseller now for more information on what DriveWorks could do for you, or visit www.driveworks.co.uk

As a SolidWorks Certified Gold Partner Product, DriveWorks is fully integrated with SolidWorks and the majority of our Resellers are also SolidWorks Resellers who in turn have a commitment to provide **added value** as well as DriveWorks training and support.

DriveWorks resellers are expected to display good product knowledge and to employ committed and experienced engineers who will successfully train and support DriveWorks Customers.

Resellers are required to commit to the DriveWorks Certification program.
